Real People, Real Service

March 16, 2006

To Whom It May Concern:

I am pleased to write this letter of recommendation for Rob Peterson. Rob worked for me in the Web Services Department at Lanlogic for the last year. He began here as an assistant web designer and served with increasing skill in that capacity. Rob was responsible for updating and maintaining client websites for Lanlogic. His tasks included creation and optimization of graphics, content creation and conversion, as well as style sheet creation and formatting. Throughout his time here, Rob demonstrated a high level of comfort with Microsoft, Adobe, Macromedia and a variety of other content creation tools.

During Rob's service with us I interacted frequently with him and depended on him to serve often as a single point of contact for several customers. Being a very self-motivated individual, Rob was willing to work hard and was eager to learn whether it was becoming the guru for a new software application such as Xtivity, hunting down a rogue div tag, or debugging Flash ActionScript. He was devoted to his work, but being a real people person, he was also enjoyable to be around.

Rob demonstrated from early on that he had the skills necessary to maintain an excellent relationship with his client base. He was well organized, careful, and consistent in his work. Most importantly, he put the customer first, by communicating well and providing excellent service.

I would like to be very clear about why Rob is leaving Lanlogic. Rob is available for new challenges only because of his desire to learn and grow further. We would have loved to see him stay, but certainly understand his need to advance beyond the positions we have available.

In closing, let me say I have no hesitation in recommending Rob Peterson for any position pertaining to web design and development. I feel confident he would be an asset to your organization.

Sincerely,

Eugene Worth
Web Services Director
Lanlogic, Inc.
